About me

I am a Software Engineer with experience in web, mobile, and application development, as well as cloud technologies and modern IT infrastructure. My key strengths include strong problem-solving skills, solid technical expertise, and effective collaboration within agile teams.

My goal is to develop innovative and sustainable software solutions that combine technical excellence with a high level of usability. I place particular emphasis on the continuous improvement of functionality, quality, and the overall user experience.

Work experience

Working student Software Developer

2024/06 - Today

- I work as a software developer and am responsible for planning, developing and finalizing software solutions.

Working student Digital Marketing

2023/05 - 02.2024

- As a working student in the field of digital marketing, I gained valuable hands-on experience in SEO, newsletter campaigns, and website support.
